

### **After Care For Your Lashes**

- Try not to get your lashes wet for the first 24 hours
- Avoid pulling or rubbing your eyes
- Do not use eyelash curlers with your extensions. With proper application you will not need them.
- ONLY use oil free makeup remover. If your eyelashes are tangled or crossed over use the wand given to you during your appointment to gently brush them straight and put them in place
- Proper hygiene is important. Please keep lashes clean by regular washing. I do offer shampoo and shampoo brushes for individual sale. Just let me know when you're here and I will go over correct method
- After showering avoid rubbing lashes, its best to blot them with a towel and let them air dry
- When using facial creams avoid the lash line, too many oil based products can break down adhesive.
- Touch up appointment every two to three weeks. Two weeks being ideal to maintain your extensions
